SUMMARY

I am a task-driven problem solver who always strives to do my best efficiently and pays attention to the details. Throughout my college career, I have focused on learning about how various computer-based systems work but also have become adept at coding in a plethora of computing languages.

SKILLS

- Database Management
- C/C++
- Quick Learner
- Java/Javascript
- HTML/CSS
- Back-end functional design

EXPERIENCE

Security Supervisor
The Classic Center, Athens GA • February 2019 - Present

As a supervisor, I am responsible for managing and training my fellow guards and delegating them to positions around the building. I also had to take command of crowds of hundreds of people during high-stress/emergency situations.

I.T. Intern
The Classic Center, Athens GA • January 2024 - May 2024

I assisted in solving the day-to-day technology and network issues throughout the building as well as organizing existing databases. I also stabilized and reorganized the camera system greatly increasing the overall security of the building. I learned a lot here, such as Windows domain controllers, network systems, and overall common computer issues, despite my short time in this position.

Intern
U.S.D.A. Forest Service , Athens GA • October 2016 - November 2018

I handled the processing, creating, and sorting of various research samples for a variety of projects with an accuracy of over 90%. This work allowed the researchers to focus on analyzing samples and data increasing project efficiency by a considerable amount.

EDUCATION

BS- Computer Science
University of Georgia, Athens, GA • August 2021 - December 2024 (Anticipated)

Highschool Diploma
Clarke Central High School, Athens, GA • August 2014 - May 2018
